## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 12-15, 17-21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pant et al (USPN 6,328,642) in view of Jensen et al (USPN 6,315,643). Pant et al disclose a seamless polishing apparatus 31 for utilization in chemical mechanical polishing comprising a polishing pad 30 being shaped like a belt, configured to have no seams, made of polymeric material or polyurethane, being between about 30 mils and about 100 mils in thickness, configured to have a grooved top surface; a base belt including a layer 34, the layer 34 is a steel layer (note Fig. 3, 4A and 4B, col. 5, line 1 to col. 6, line 21). However, Pant et al do not disclose a base belt including a reinforcement layer and a cushioning layer. Jensen et al disclose a base belt including a multiple layers 42 and 46, wherein the layer 46 is an intermediary layer between the polishing pad and the base belt, wherein the layer 46 is a sponge like material or polyurethane material (note Fig. 4, col. 3, lines 32-53). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus of Pant et al with the base belt as disclosed by Jensen et al in order to produce an even wafer surface.

Claims 8, 16, 22 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pant et al (USPN 6,328,642) in view of Jensen et al (USPN 6,315,643) as applied to claims above. Pant et al, as modified by Jansen et al, lacks the thickness of a cushion layer between about 10 mils and about 100 mils. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select the thickness of the cushioning layer between about 10 mils and about 100 mils, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

***Allowable Subject Matter***

Claims 24-26 and 28-35 are allowed.

Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: prior art of record fails to disclose or imply a seamless polishing apparatus comprising a cap or a cover configured to cover an adhesive film between the base belt and the polishing pad or a method for generating a polishing pad structure comprising providing a reinforcement layer, applying a first adhesive film over the reinforcement layer, attaching a cushioning layer on the first adhesive film, applying a second adhesive film over the cushioning layer, attaching a seamless polishing pad on the

Art Unit: 3723

second adhesive layer and curing the polishing pad structure, as specifically recited by applicant's respective claims.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lombardo is cited to show belt polishing apparatus.

**Attachment for PTO-948 (Rev. 03/01, or earlier)**

**6/18/01**

**The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.**

**INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

**1. Correction of Informalities -- 37 CFR 1.85**

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

**2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.**

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

**Timing of Corrections**

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
